

FREE COVID-19 VACCINES FOR KIDS AGES 5 TO 11

PROTECT YOUR CHILDREN, FAMILY, AND COMMUNITY

Did you know that 5 million kids ages 5 to 11 have gotten their COVID-19 vaccine?

WHY?

Kids can get very sick from COVID-19

Kids can have both short and long-term effects from COVID-19

Kids can spread COVID-19 to others, including at home and school

HELPFUL INFO

- Kids (ages 5 to 11) receive one-third of the adult dose of the vaccine.
- Your child will need a second shot three weeks after their first shot.
- Your child can receive the COVID-19 shot and flu shot at the same time.
- Smaller needles designed for children are used.

Free vaccine clinics are taking place in Stamford's parks and buildings.
